# Window Cleaning Services Domestic and Commercial

We make it easy for you to sit back, relax and actually enjoy the view from your office or home. Throughout the year, DSG Hygiene Services provides professional window cleaning to all types of commercial properties - from office buildings, colleges and auto dealerships, high rise buildings and store fronts not to mention many private houses.

We work with business owners and property management companies to identify the needs and concerns of each particular job no matter the size. Our on-location supervisors ensure that the crew performs their services without disrupting the normal day-to-day routines at your place of business.

DSG Hygiene Services Division offers a complete range of products and services for your washroom.

The range includes:

- Cabinet roller towels
- Warm air dryers
- Soap dispensers and soaps
- Air fresheners and cartridges
- Feminine hygiene vending and disposal services

DSG Hygiene Services Division provides a wide selection of washroom products and services including cabinet towels, soap dispensers and air fresheners and all the necessary consumable items and refills.

We help you select the products you require from our wide range of table linen, bed linen, towelling and other textile items. We work with you to understand your business and then calculate the level of stock your property needs. We buy the right quantity of stock and bring it into the property at a time agreed with you. We then agree a delivery schedule with you to collect soiled items and deliver clean, laundered items.

## Laundry Only Service

If you already have your own linen, DSG Hygiene Services Division can launder it for you, collecting soiled linen from you and delivering clean linen in return.

All types of floors professionally maintained, including stripping, sealing, and polishing.

We can draw up scheduled floor maintenance, so you don't have to worry about when your floor needs to be cleaned.

Carpets in commercial areas generally require more regular cleaning due to the large amount of traffic they are subjected to. For this reason, the way these carpets are cleaned is quite different to a domestic carpet process.

Commercial flooring requires different cleaning solutions, and in the case of restaurants and hotels, extremely hot cleaning temperatures are required to successfully dissolve oil, grease, and food deposits. A high suction level is also required to leave the cleaned area as dry as possible so you can go about your business with minimal disruption to normal day-to-day activities.

We can also design a maintenance program best suited to your individual business needs so you don't have to worry about when your next cleaning is due.
